

## New features

| <i>ID</i>               | <i>Description</i>                                                                                                                                                                                                             |
|-------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <a href="#">#112404</a> | Risk assessments: Implemented quantitative category Min/Max value auto filling on category level selection and ML value auto filling with a calculated average.                                                                |
| <a href="#">#292828</a> | Risk domain setup: Implemented unchecking and disabling of "Use" checkboxes if the caption has been deleted.                                                                                                                   |
| <a href="#">#339004</a> | Risk notifications: Notifications will not be sent to the risk owner on action changes if the actions have been updated by the risk owner.                                                                                     |
| <a href="#">#315200</a> | Risk Lifting: Implemented prompts on preview and lifting to warn the user if the filter criteria are not set.                                                                                                                  |
| <a href="#">#317897</a> | Risk Lifting: Implemented the 3way toggle for the Include lift to Domain option. Closed under WF: 315200                                                                                                                       |
| <a href="#">#314693</a> | Action navigation: Implemented action selection dropdown on the action modal for easier navigation between actions.                                                                                                            |
| <a href="#">#315296</a> | Risk Dashboard: <ul style="list-style-type: none"> <li>• Implemented default filter to filter out lifted Risks.</li> <li>• URL where clause handling enabled.</li> <li>• Added tooltips and descriptions of charts.</li> </ul> |

## Changes & fixes

| <i>ID</i>               | <i>Description</i>                                                                                                                                                        |
|-------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <a href="#">#349195</a> | Risk Reports: Added domain parameter to the code module handling report generation, this fixes the issue with occasional incorrect domain reference on the reports.       |
| <a href="#">#288864</a> | Risk Reports: Fixed grouping on the Risk and Actions by Risk Owner report.                                                                                                |
| <a href="#">#345012</a> | Risk URL link formatting: Changed risk and action link formatting from http to https protocol.                                                                            |
| <a href="#">#348196</a> | Risk Dashboard: Fixed tile cross-domain totals/percentages calculation.                                                                                                   |
| <a href="#">#319515</a> | Risk Global Setup: Removed hide opportunities option                                                                                                                      |
| <a href="#">#332382</a> | Risk Export Import: Fixed copying/moving risks - border conflict check is skipped if assessments are unselected.                                                          |
| <a href="#">#315200</a> | Risk Lifting: Fixed the dynamic SQL filter concatenation logic in preview, manual lifting and scheduled lifting procedures.                                               |
| <a href="#">#321374</a> | Risk Domain Setup: Removed Assessment without Probabilities option as it was never used in Web risk management                                                            |
| <a href="#">#348972</a> | Multiple risk creation: Fixed Risk details multiple Risk creation Title error                                                                                             |
| <a href="#">#349018</a> | Risk Export Import: Fixed multiselect on the move/copy grid skipping the first selected row. Closed under WF: 332382                                                      |
| <a href="#">#339123</a> | Lifted Risk linking: Fixed links with special characters in RiskID: <ul style="list-style-type: none"> <li>• Source Risk links.</li> <li>• Related Risk links.</li> </ul> |
| <a href="#">#338138</a> | Risk List resizing: Fixed risk list resizing on the side filter details and other panels.                                                                                 |
| <a href="#">#315296</a> | Risk Dashboard: Fixed totals of "unmitigated risks" in Risk dashboard, 0 if all risks are filtered out.                                                                   |
