Area: Pims DC
Release: DC 24.01

New Features

ID	Feature	Description
173082	Correspondence	Distribution Templates functionality has been introduced for Correspondence.
297317	Documents Profile	An option to replace files in previous revisions has been added.
194418	Domain Setup	Introduced an option to define custom revision file types.
300647	Follow-up	An option to manually mark revision as returned to the originator has been implemented in "Reviewed but not Returned to Originator" follow-up application.
146377	General	Offline Archive functionality has been reworked to use a browser-based client and to have archive data generated by scheduler job rather than immediately upon user request.
174305	Redlining	Redlining process is now a part of Distribution Setup. Redlining process now can be started automatically depending on steps configuration.
172988	Review	Introduced an option to lock review response PDF to prevent tampering.

Changes & Improvements

ID	Feature	Description
290548	3rd-Party Verification	An option to un-cancel verification has been added.
298878	3rd-Party Verification	Improving 3rd party follow up by showing latest verification status in the grid and including all verifications related to document in detail panel.
300520	Batch Import	Improved data export from worksheet into Batch Import by introducing more flexible identification of "File Type" and "File Name" columns.
295110	Batch Sharing	Changed the default filter for correspondence to be shared.
303605	Batch Sharing	Handed-over documents shall no longer appear in the list of documents to be shared.
297193	Contracts Setup	Updated the info message when no changes were committed for selected receiver when making changes in interface documents notifications setup.
303610	Contracts Setup	Improved the performance of sharing Contract Documents.
301045	Delegation	Changes in delegation return process, reviews with delegated actions which were assigned to another person during active delegation won't be returned only logged in delegation logs.
284925	Documents Profile	Updated the display method for actions related to revision files. Fixed an issue that caused SharePoint links to not appear for internal project revisions of external documents.
307773	General	Added missing access permissions to Shared Documents and Correspondence application for Document Controller role.
297302	Review	Resolved an issue that resulted in not generating response PDF when there were no comments associated with the PDF.
307202	Review	Resolved an issue that prevented users from finalizing review with more than one password protected PDFs.
183288	Sharing Documents and Correspondence	Added the "Contractor Document ID" column to the grid of Shared Documents and Correspondence application.
295408	Sharing Documents and Correspondence	A column "Shared By" has been added into the grid. Renamed "User" column to "Shared With User" and now it shall display a full name instead of login.
302174	Site Modifications	Updated rescope functionality in early warning cases in SM Project details application.
307826	Site Modifications	Changed how system tracks handed-over revisions improving overall performance of revisions manipulation.
79785	Transmittals	Links to documents have been added into outgoing transmittals details.
297298	Transmittals	InitiatorName field has been added into Transmittals details Web application.
303310	Transmittals	Resolved an issue that resulted in auto-generated incoming transmittals being shown with incorrect status and not being accessible to contractors.
300862	Upload Documents	A verification check for submitting revision to an internal document for external users has been added.
304352	Upload Documents	Removed dot/decimal revision notation based on base revision in Site Modification domain.
