

Release Notes

Area: Pims DC
Release: DC 23.11

New Features

ID	Feature	Description
154023	Contracts Setup	Purchase Order now can be linked with contracts, eliminating restriction by company ID.
167868	Contracts Setup	Extended logging has been added for contracts members.
193783	Correspondence	Extended logging has been added for referenced documents and related correspondence.
183720	Documents Profile	Option to view revisions history has been added into documents profile in Operations domains.
194698	Documents Profile	Introduced new statuses, "Review Cancelled" and "Review Expired," into the document's workflow status set.
188738	Documents Register	Introduced additional instance fields for documents.
193756	Documents Profile	Extended logging has been added for referenced documents and correspondence.
180259	Email Notifications	Implemented an option to send reminders to contractors for planned overdue new revisions.
195206	Tasks	A new Scheduler Job has been added to delete old scheduler jobs logs based on the retention period.

Changes & Improvements

ID	Feature	Description
166879	3rd-Party Verification	Removed check preventing contract members from different companies than contract's to submit new files for verification.
193741	3rd-Party Verification	Various improvements for "request documents" functionally across 3PV applications.
185173	Batch Import	Resolved an issue by clearing the dependent attributes when dependent attributes to bypass verification when their controlling attributes were changed in the import.
193900	Batch Import	Data changes dialog now shall contain projects' metadata when applicable.
192915	Contractor Submittals Import	"Appendix" file type has been added into lookup of available file types.
77741	Contractors World	Client Acceptance Code column has been added into "DocumentsListWebLinks" tag for "EmailTemplateClientCommentsUploaded" template.
171188	Contracts Setup	Improved performance of downloading projects files from Documents Register.
192576	Dashboard	Added missing dashboard table permissions for Internal Document Controller role.
124837	Demobilization	Demobilization shall only check ongoing processes for checked out files.
188735	Demobilization	Improved the performance of Demobilization verification process.
189348	Demobilization	Demobilization shall only check draft revisions for revisions authors.
189505	Demobilization	Introduced additional confidentiality checks to verification procedure.
193100	Distribution Matrix	Aligned the use of a person's name across the add/replace dialogs.
257794	Documents Profile	PO Number now shall be available in the revision edit dialog when concurrent engineering is enabled.
193068	Documents Profile	Updated behavior of file renaming when replacing or checking in a revision file.
257871	Documents Profile	Updated projects lookup behavior to refresh the data every time the lookup is being opened.
288181	Documents Profile	A check for preexisting suggested review class has been added into verification procedure of moving data to another document profile.
153900	Maintenance: Best Practices	Default datalogging shall be disabled extended logging tables.
193428	Maintenance: Best Practices	The delegations job shall now specify the delegation ID in the scheduler logs when the delegation encounters an error.
195423	Review	Updated redirect link generation to include project references for "Review Initiated" email template.
284901	Review	Information of expired review now shall be captured in database instead of reapplying on every related query.
188858	Site Modifications	Support and Appendix files now shall be added into a scope for Site Modification.
189811	Site Modifications	Action "Handover to Operations" now shall redirect to a Handover process.
192843	Site Modifications	Revision date is taken into account instead of Created date when evaluating Site Modification Project documents for "Ready for Handover to Operations".
284218	Site Modifications	Improved the resolution process by not allowing DCC to resolve a conflict without file submission.
166676	Upload Documents	Users will not be able to submit review reply files if a setting "Enable Review Comments Responses" is disabled for the contract.
185893	Upload Documents	Support for Z revision numbering scheme has been added.

Release: DC 23.11

Fixes

ID	Feature	Description
194033	3rd-Party Verification	Fixed an issue that prevented users from submitting new verification when the current verification has only files for information.
250557	3rd-Party Verification	Fixed an issue that made the Reply button visible for the Originator before the Verifier had completed their action.
193591	Contractor Submittals Import	Fixed an issue that caused import review response comments to failed due to longer description of review class.
188742	Correspondence	Fixed an issue that prevented users from editing an empty response to a question/comment in Comments section.
193949	Correspondence	Fixed an issue that resulted in incorrectly determining the capability to define sequential number for a correspondence.
194279	Correspondence	Fixed an issue that caused data duplication in lookups of company codes.
284368	Correspondence	Fixed an issue that prevented a user with the "Manage all correspondence" capability from using all correspondence templates assigned to a contract.
189353	Demobilization	Fixed an issue that caused the demobilization process to attempt to remove the approval participant after they had completed their action.
288369	Distribution Template	Fixed an issue that prevented users from using Distribution Template with one (1) criteria.
188673	Documents Profile	Fixed an issue that prevented users with no capability to define sequential numbers from creating a free-text document ID.
190111	Documents Profile	Fixed an issue that caused domain lookup to timeout in References tab.
193171	Documents Profile	Fixed an issue that prevented the display of revisions metadata after the revision had been modified.
183850	Documents Register	Fixed an issue that caused links to SharePoint to not appear for applicable files in the side panel.
185579	Documents Register	Fixed an issue that prevented users from creating a navigation view.
191117	Documents Register	Appendix and Support files now shall be included when downloading revisions files in a batch in Site Modification domains.
192254	Documents Register	Fixed an issue that caused export to grid functionality to not include timezone information by default.
192671	Documents Register	Fixed an issue that caused incorrect revision number to be displayed in details panel.
191540	Domain Setup	Fixed an issue that caused copying DC value from another domain to fail due to wrong order of commands
191590	Review	Fixed an issue that resulted in inconsistencies in setting reviewers deadlines when adding them in batch versus one by one.
284614	Review	Fixed an issue that prevented external super users and document controllers from changing Review Responsible in ongoing review.
285210	SharePoint Integration	Fixed an issue that prevented users from changing the file type of a file that was still being uploaded into SharePoint.
183975	Sharing Documents and Correspondence	Fixed an issue that allowed users to commit multiple instances of sharing the same document in Contract's Documents.
288198	Site Modifications	Fixed an issue that caused documents scoping into SM fail due to redundant engineering tags population.
288517	Tags Upload	Fixed an issue that prevented users from submitting documents tags when the one of the tags were in "Reserved" status.
190770	Tasks	Fixed an issue that caused Prepared Emails Checks to fail with an error "The ConnectionString property has not been initialized".
286266	Tasks	Fixed an issue that caused Scheduler to failed on sending review/approval reminders when at least one of receiver was missing email address.
288515	Transmittals	Fixed an issue that caused wrong Company Code to be used when manually creating new incoming transmittal.
284688	Upload Documents	Fixed an issue that resulted in auto-picking Source Revision for Reply files.
284691	Upload Documents	Fixed an issue that caused incorrect file validation when 2 users were submitting files for the same document and revision.
288184	Upload Documents	Fixed an issue that caused incorrect auto-selection of Source Revision when parsing information from filename.
