Fixes

ID	Feature	Description
291433	3rd-Party Verification	Fixed an issue that prevented users from sending documents for 3rd Party Verification to a newly added 3PV contract after a previous contract that finished a verification is removed from a documents distribution setup.
169227	Asset Setup	Fixed an issue that prevented asset managers from changing the values of fields like FacilityID/Area, Equipment Families/Types, Fields/Wells and etc.
185997	Approval	Fixed an issue that prevented revision author to assign approvers/verifiers when initiating approval.
293189	Batch Import	Fixed an issue that resulted in indicating "Show All" as always active filter.
292441	Documents Profile	Fixed an issue that prevented users with capability to commit suggested review classes from carrying out a commit.
290181	Domain Setup	Fixed an issue that resulted in incorrect filter to be used on Use for Documents in Classification Categories.
296817	Review	Fixed an issue preventing review participants from checking out native files for review.
193363	Sharing Documents and Correspondence	Fixed an issue that caused notifications emails to not be logged when sharing contract documents with special symbols in document IDs
287741	Site Modifications	Fixed an issue that prevented users from setting up a phase for a site modification project due to incorrectly showing domain specific phases instead of system ones.
163662	Transmittals	Fixed an issue that caused documents handed over to operations being added into ongoing transmittals when adding reviewed documents not yet returned.
180341	Upload Documents	Fixed an issue that prevented external users that are treated as internal from submitting new revision.
